

Dr. José Baeza Noci

Dr. José Baeza Noci, is a graduate from the University of Valencia, School of Medicine (Spain). He obtained his Degree in Medicine in 1989 with high distinction. In 1992, he received his Doctorates in Medicine, graduating with Cum Laude latin honors. His dissertation was developed in the Morphological Sciences Department of the University of Valencia, titled “Escoliosis experimental por lesión directa del cartílago neurocentral,” directed by Dr. A. Martínez Almagro.

Dr. Baeza Noci’s scientific work has been recognized at an international level. Dr. Baeza Noci, also received his Master’s degree in 2007, in Health Management and Sanitary Systems at the European Institute of Health and Social Care—University of Alcalá de Henares (Madrid, Spain). He has been advisor of the Spanish Health Minister in Orthopedics and Trauma for five years. As one of the WFOT’s founders and board members, and now current President, Dr. Baeza Noci has also been associated with the following scientific organizations:

Member of the SOTOCAV

(Sociedad de Tramatóloga y Ortopedia de la Comunidad Autónoma Valenciana)

Member of the SICOT

(Sociedad Internacional de Cirugía Ortopédica y Traumatología)

Member of the ISMISS

(International Society of Minimal Invasive Spine Surgery)

Member de la ACEOOT

(Asociación Científica Española de aplicación de Oxígeno-Ozonoterapia)

(until 2008) – Vice President (2005-2008)

Founding member of the SEOT

(Sociedad Española de Ozonoterapia)

-President since October 2009

Since 2002, Dr. Baeza Noci has been a practicing orthopaedic and trauma surgeon for the Hospital Virgen Del Consuelo in Valencia, Spain. He has devoted all his investigatory efforts to the ozone application in his field.

In February 2015, he started working again in the School of Medicine of the University of Valencia (Spain) as Professor of Human Anatomy.

During this year, he founded the Journal of Ozone Therapy, official journal of the WFOT, and become Editor-in-chief.

In November 2016, during the V WFOT Meeting, he was awarded with Francesco Ricardo Monti prize for the great merit of having managed as President of the WFOT, promoting research into ozone and simultaneously managing to unite under a single banner – WFOT – all national scientific societies of ozone therapy.
